GAME DEVELOPMENT / GAME DESIGN / SOFTWARE DEVELOPMENT

PROFESSIONAL SUMMARY

Recent Northern Arizona University graduate with a Bachelor of Science in Immersive Media and Games. Built playable games, a two-player game prototype, and software for editing gameplay footage. Interested in game design, gameplay programming, and software development.

EDUCATION

Northern Arizona University | Flagstaff, Arizona

Bachelor of Science in Immersive Media and Games • Graduated May 2026 • GPA: 3.62/4.00

Academic honors: Dean's List — six consecutive semesters (3.5+ semester GPA)

Relevant coursework: 2D & 3D Game Engines; Computer Graphics; Real Time Rendering; Data Structures; Web Programming I; Requirements Engineering; Games User Research.

SKILLS & TOOLS

Game development: Godot (GDScript), Unity, Unreal Engine, Construct, Twine

Programming & web: C, C++, C#, Kotlin, Java, JavaScript, HTML, CSS

Design: SolidWorks (7+ years), Blender, 3D modeling, website design

SELECTED DEVELOPMENT PROJECTS

Project Paradox | Independent Study, NAU • Fall 2025 • Godot / GDScript

- Built a working two-player game prototype with character selection, split-screen play, movement, attacks, and health systems.
- Created different abilities for Joan of Arc and Nikola Tesla, including teleportation and projectile-based attacks, and designed stages around collecting tokens.

Code and project files: github.com/zdp35/IMG497

Game Studio | Personal project • Sole developer • In development

- Independently building a desktop application that scans recorded gameplay for highlights, lets users approve or reject clips, and assembles chosen clips into montages and short videos.
- Built separate analysis, review, and editing tools, then tested the results and adjusted clip timing, audio levels, and how videos fit with music.

Published Games | Seven course projects • Primary developer

- Designed and published seven playable games for NAU courses, using Unity, Construct, and Twine. Projects include Zombie Pitfall (puzzle game) and Dante's TimeSlip (interactive story).
- Served as primary developer, building the games, testing how they played, and refining them through coursework.

Playable projects: zdp35nauedu.itch.io

Decked Out — Monte Cook Games | NAU capstone • Kotlin / Android

- Worked with a student team to build a Kotlin Android app for organizing Monte Cook Games card collections and campaigns.
- Worked on the app's screens, created the public website explaining the project, and kept team records as the project recorder.
